Performance

Performance, precision and responsiveness

Efficiency

High level of productivity for a lower overall operating cost

Reliability

Result of ongoing improvements

Comfort

Spacious, ergonomic and with high-visibility

Maintainability

Simplified daily checks, longer maintenance intervals

Performance

Performance, precision
and responsiveness

Advanced techniques heighten performance

In its design offices, Liebherr combines the technological know-how of each area to create consistent and optimised integrated systems. Liebherr's electronics, positive control hydraulics, and even the engines are designed from the start to be interconnected and generate optimum operating power with fast and fluid movements.

Positive Control hydraulic system

Two working pumps for maximum excavation power and travel power, and a pump serving the rotation circuit provides power to the components involved. Thanks to the positive control system, the combined movements are optimised for each different work operation, whether this be levelling, extraction/loading or lifting, with or without travel.

Particularly fast work cycles

The work cycles of the R 936 are very fast thanks to the large sized transmission components. For example, the uppercarriage's swing drive can quickly reach its maximum speed with a high swing torque.

Operating pressure

Maximum digging and break-out forces can be reached thanks to the level of hydraulic pressure, without applying temporary overpressure. Maximum forces are therefore guaranteed continuously during the whole working phase to achieve a high level of production.

Liebherr Engine

- New Stage Tier4f engine with SCR exhaust gas after-treatment system
- Designed specifically for construction applications
- Liebherr common rail injection system for optimised output
- Automatic fuel-saving idling system
- Fixed geometry turbo charger

Undercarriage

- Robust design for greater resistance and a better distribution of forces
- Easy and safe transport thanks to integrated securing hooks
- Three different types of undercarriages, one with variable gauge, adapted to different operating configurations and transport conditions

Wide range of operational possibilities

- Large number of equipment variants
- Versatile selection of undercarriage variants
- Attachments for all applications: short attachments for mass extractions, and long-reach, standard, luffing jib attachments

Efficiency

High level of productivity for
a lower overall operating cost

Less fuel

The new 4-cylinder Liebherr engine, pursuant to the Stage Tier4f emission standards, comprises a diesel exhaust fluid injection device (SCR) for the after-treatment of exhaust gases, with no need for a particle filter, diesel oxidation catalyst or EGR. Associated with the latest technological advances in hydraulics, this engine consumes less fuel, both in terms of hours of operation and in terms of tons of material moved.

Increased productivity

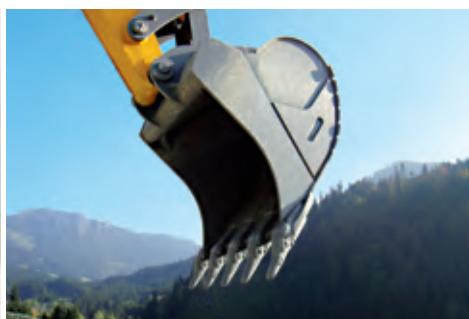

Clearly enhanced performance thanks to new equipment and lower consumption, all in a comfortable and ergonomic work environment, lead to remarkable gains in productivity in all operating configurations.

Simplified and lower-cost maintenance

Non-slip platforms and ergonomic handles allow fast and easy access to all maintenance points not accessible from the ground. The absence of a particle filter reduces maintenance time, the cost of spare parts and filter regeneration operations.

Electronic power control

This control system allows the engine power to be effectively and optimally converted, from an energetic point of view, into hydraulic power. This is as a result of greater forces, a faster working speed and a lower fuel consumption.

Liebherr Lubricants

- Liebherr lubricants are specially developed for application in Liebherr earth moving and material handling machines and guarantee a long working life whilst simultaneously delivering the highest possible performance
- Being designed especially for your Liebherr machines, Liebherr lubricants contribute significantly to lowering your operating and maintenance costs.

Liebherr tools

- Wide range of tools suitable for every type of application
- Tools designed for maximum productivity and durability
- Shape of buckets designed to assist the filling and stability of bulky materials during the transport stages
- Hydraulic quick coupler system

Modular quick-change system made by Liebherr

- Likufix – connects all hydraulically mounted tools without having to leave the operator's cab, maximum productivity due to tool change being performed in a matter of seconds
- The suitable digging tool for every application. Your machine is a multifunctional tool carrier and will pay for itself very quickly indeed
- Mechanic and hydraulic Liebherr quick-change adapter

Reliability

**Result of ongoing
improvements**

Quality in the minutest details

Robust and large-sized components, optimal fitting of electrical and hydraulic lines, or an exemplary level of finishing are just some of the many criteria that ensure a maximum quality of manufacture and operability.

A top-of-the-range anti-corrosion protection

A pre-assembly painting process guarantees that all painted parts are fully coated. The same quality can thus be guaranteed for all special colours specifically requested by the most exacting customers. This process is also compatible with additional protection treatments for machines operating in an aggressive saline environment.

Perfect match

The individual components of the power train, such as the diesel engine, gears, swing drive, working pumps and hydraulic cylinders are designed and manufactured by Liebherr. This means that they are all compatible with each other in a global system, guaranteeing greater reliability and a longer service life.

Automatic control of functionality

The operator can entirely focus on his job, because the integrated on-board electronic continuously performs a comparison with pre-determined target data. Eventual deviations from the target parameters are shown on the display.

SCR system with diesel exhaust fluid (AdBlue®)

- Diesel exhaust fluid level indicator on the display
- Liebherr design
- Complies with Stage Tier4f standard
- No need for particle filters (DPF), diesel oxidation catalyst and EGR
- Simple system for enhanced reliability and less maintenance

Key technologies – Made by Liebherr

- Perfect matching of the components to construction machine operations
- Engine, hydraulic pumps, transfer gears, travel drives, slewing drives, slewing rings, and electronic components – all from the same source
- Main steel components, such as undercarriage, equipment modules, and slewing superstructure, all designed by Liebherr

Spare parts service

- Any spare parts required are available within 24 hours – worldwide. And that means high operational readiness of the machines, wherever, whenever
- Over 80,000 spare parts in stock at all times

Comfort

**Spacious, ergonomic
and with high-visibility**

A first class work space

In this cab, the operator has a pneumatic seat with horizontal and vertical damping, lots of space and a very comfortable and silent work environment. Depending on the operator's needs, the Liebherr Premium seat can also be chosen as an option.

This seat offers maximum seating comfort thanks to its pneumatic lumbar support, its electronic weight-actuated height adjustor and its air-conditioning with activated charcoal and built-in fan. It is especially designed to meet the most exacting requirements of operators in terms of comfort, in all working situations.

Low noise level and vibrations

To diminish fatigue at work and increase productivity, the acoustic power inside the operator's cab is minimized. The cab is mounted on viscoelastic rivets to fully absorb the excavator's vibrations. The rubber flanges also support the pipes and actively participate in reducing external noise.

Uncompromised visibility

The very large glazed surface area and minimal area of uprights guarantee optimal visibility from the operator's platform, as well as a wide safety exit from the rear window for the operator's safety and peace of mind.

Ergonomic proportional manipulators

The proportional manipulators are very finely tuned controls for the sensitive, accurate and fluid operation of hydraulic tools. This type of control is ideal for an R 936 used in a variety of applications.

Touch-screen display

- 7-inch touch-screen with colour display
- Wide range of adjustment, check, and monitoring possibilities
- Tough, reliable design (sealing tightness class IP 65)
- Video capacity with high resolution, reproduces the image from the rear area monitor camera in best possible quality

Heightened visibility

- Rear camera integrated in the counterweight as standard (camera for side area monitoring optional), for rear visibility and heightened operating safety
- Optimized design of the whole uppercarriage providing the operator with an improved field of vision
- Retractable laminated glass roof panel
- Secure emergency exit through the rear window

New options

- Engine compartment lighting
- LED headlights with adjustable intensity
- 360° camera
- Follow me home (headlight cutoff delay)
- Windscreen wiper on bottom part from front window
- Preparation for automatic pedestrian detection system
- Preparation for machine guidance system
- Preparation for weighing system

Maintainability

Simplified daily checks,
longer maintenance intervals

Simplified daily checks

The daily checks were taken into account from the start of the design, to make them simpler, more accessible and shorter. The engine oil or diesel exhaust fluid levels, for example, can be checked via the display in the operator's cab. The automatic centralised lubrication system can save precious intervention time, while guaranteeing that the excavator is in optimum operating condition.

Longer service intervals

The frequency of the service intervals is optimised to guarantee that each part is operating optimally and that the maintenance operations are only performed as necessary. Whether it is the interval for changing the hydraulic oil, which can be up to 8,000 hours, or the interval for changing the engine oil, which can reach 2,000 hours, everything has been taken into account to reduce the frequency of interventions and thus limit the machine's downtime and reduce costs.

A maintenance-free exhaust gas treatment

Thanks to its unique Liebherr design, the exhaust gas treatment is carried out in compliance with the Stage Tier4f standards, without fitting a particle filter, diesel oxidation catalyst or EGR. This results a maximum reliability in an output with no loss of productivity linked to the regeneration of these filters and, of course, there is no maintenance time or cost for spare parts associated with this technology.

Expert advice and service provisions

Liebherr offers an expert advice service. Qualified personnel will help you make the appropriate decisions to meet your needs: sales arguments based on the terrain, service agreements, advantageous repair alternatives, original parts management, and remote data transfer for fleet management.

LiDAT data transfer system

- Complete fleet management, all from one source
- Optimized economical performance of the machine park thanks to detailed view of the distribution of operating states and times
- Reports on capacity commitment and the use of the machine park can be called up daily via the Web portal
- Precise location of the machine
- Regional delimitation and fixed downtimes increase safety and reliability

Hydraulic reservoir stop valve

- Easy and quick interruption of the oil circuit between hydraulic reservoir and hydraulic system
- No drainage of fluid necessary for service or repair work on the hydraulic system

Central lubrication system

- The fully-automatic central lubrication system, fitted as standard, allows for rapid maintenance: It saves time-consuming individual lubricating and downtime
- All the lubrication points on the superstructure of the vehicle and the attachment hydraulics are supplied, with the exception of the connecting plate
- Engine oil level visible on display

Long live progress with the R 936

Equipment

- Cast steel elements
- Greater resistance to stresses
- Optimal lifetime
- New equipment strengthened with more force

Tools

- Z-type Liebherr teeth for fast replacement
- Wide range of work tools
- QC48 and QC66 Liebherr quick-couplers both available

Undercarriage

- Special heat treatment for low wear and tear of drive sprockets
- A wide range of undercarriages suited to each application
- Robust construction

Operator's cab

- Comfortable and ergonomic
- 7" high resolution color touchscreen for heightened readability
- Rear window with improved visibility

Automatic centralized lubrication - standard

- Reduced maintenance time
- Longer service life thanks to better lubrication

Visibility

- Rear camera integrated in the counterweight
- Optimized design of the whole uppercarriage providing the operator with a better field of vision
- Large glazed surface area with secure emergency exit through the rear window

Technical Data

Engine

Rating	per SAE J1349 per ISO 9249	228 HP (170 kW) at 1,800 rpm 231 HP (170 kW) at 1,800 rpm
Torque		922 lbf ft at 1,100 rpm
Model		Liebherr D934 A7
Type		4 cylinder in-line
Bore/Stroke	4.8/5.9 in	
Displacement	427 in ³	
Engine operation	4-stroke diesel	Common-Rail, monoturbo
Exhaust gas treatment	SCR with urea injection	emission standard Tier 4 final/Stage IV
Cooling system	water-cooled and integrated motor oil cooler, after-cooled and fuel cooled	
Air cleaner	dry-type air cleaner with pre-cleaner, primary and safety elements	
Fuel tank	148 gal	
Urea tank	17 gal	
Electrical system	Voltage Batteries Starter Alternator Engine idling	24 V 2 x 180 Ah/12 V 24 V/7.8 kW three-phase current 28 V/100 A sensor controlled
Motor management		connection to the integrated excavator system controlling via CAN-BUS to the economical utilisation of the service that is available

Hydraulic Controls

The controlling is conducted via the integrated excavator system technology, input and output modules, communicated via the CAN-BUS with the electronic central unit	
Power distribution	via control valve with integrated safety valves
Servo circuit	
Attachment and swing	proportional via joystick levers
Travel	– with proportionally functioning foot pedals and adjusted with a pluggable lever – speed pre-selection
Additional functions	proportional regulation via foot pedals or rocker

Hydraulic System

Hydraulic system	Positive Control dual circuit hydraulic system for independent and need-based quantity allotment via the hydraulic pumps; sensor-guided. Features high system dynamics and sensibility provided by integrated system controlling. Independent circuit for rotation.
Hydraulic pump	
for attachment and travel drive	Liebherr, variable displacement, swashplate double pump
Max. flow	2 x 63 gpm
Max. pressure	5,511 psi
for swing drive	reversible, variable flow, swashplate pump, closed-loop circuit
Max. flow	46 gpm
Max. pressure	5,800 psi
Pump management	electronic pump management via the integrated system controlling (CAN-BUS) synchronous to the control block
Hydraulic tank	71 gal
Hydraulic system	max. 126 gal
Hydraulic oil filter	1 full flow filter (10 µm) in return line with integrated fine filter area (5 µm)
Cooling system	compact cooler, consisting of a water cooler, sandwiched with hydraulic oil cooler, gearbox oil cooler, fuel cooler and after-cooler cores and hydrostatically driven fan
MODE selection	adjustment of engine and hydraulic performance via a mode pre-selector to match application, e.g. for especially economical and environmentally friendly operation or for maximum digging performance and heavy-duty jobs
RPM adjustment	stepless adjustment of engine output via RPM at each selected mode
Tool Control	10 preadjustable pump flows and pressures for add-on tools

Swing Drive

Drive	Liebherr swashplate motor
Transmission	Liebherr compact planetary reduction gear
Swing ring	Liebherr, sealed race ball bearing swing ring, internal teeth
Swing speed	0 – 9.3 rpm stepless
Swing torque	69,330 lbf ft
Holding brake	wet multi-disc (spring applied, pressure released)

Operator's Cab

Cab

ROPS safety cab structure with individual windscreens or featuring a slide-in subpart under the ceiling, work headlights integrated in the ceiling, a door with a side window (can be opened on both sides), large stowing and depositing possibilities, shock-absorbing suspension, sounddamping insulating, tinted laminated safety glass, separate window shades for the sunroof window and windscreen, 12 V plug, storage bins, lunchbox, cup holder

Operator's seat

Comfort seat, airsprung with automatic weight adjustment, vertical and horizontal seat damping including consoles and joysticks. Seat and armrests adjustable separately and in combination, seat heating as standard

Control system

Operation and displays

arm consoles, swinging with the seat
large high-resolution color display with selfexplanatory operation via touchscreen, video, versatile adjusting, control and monitoring facilities, e.g. climate control, implement and tool parameters

Air-conditioning

standard automatic air-conditioning, ambient air function, fast de-icing and demisting at the press of a button, air vents can be operated via a menu. Ambient air and fresh air filters can be easily replaced and are accessible from the outside. Heating-cooling unit, designed for extreme outside temperatures, sensors for solar radiation, inside and outside temperatures

Undercarriage

Versions

NLC	gauge 7'10"
LC	gauge 8'6"
LC-V	gauge 7'10"/8'2" (transport position) gauge 9'9"6" (work position)

Drive

Liebherr swashplate motors with integrated brake valves on both sides

Transmission	Liebherr planetary reduction gears
Travel speed	low range – 2.0 mph high range – 3.2 mph

Net drawbar pull on crawler

NLC/LC:	58,675 lbf
LC-V:	66,094 lbf

Track components

Track rollers/Carrier rollers	D7, maintenance-free
Tracks	sealed and greased

Track pads

Track pads	triple grouser
Holding brake	wet multi-discs (spring applied, pressure released)

Brake valves

Brake valves	integrated into travel motor
Lashing eyes	integrated

Attachment

Type	combination of resistant steel plates and cast steels components
Hydraulic cylinders	Liebherr cylinders with special seal-system, shock protection

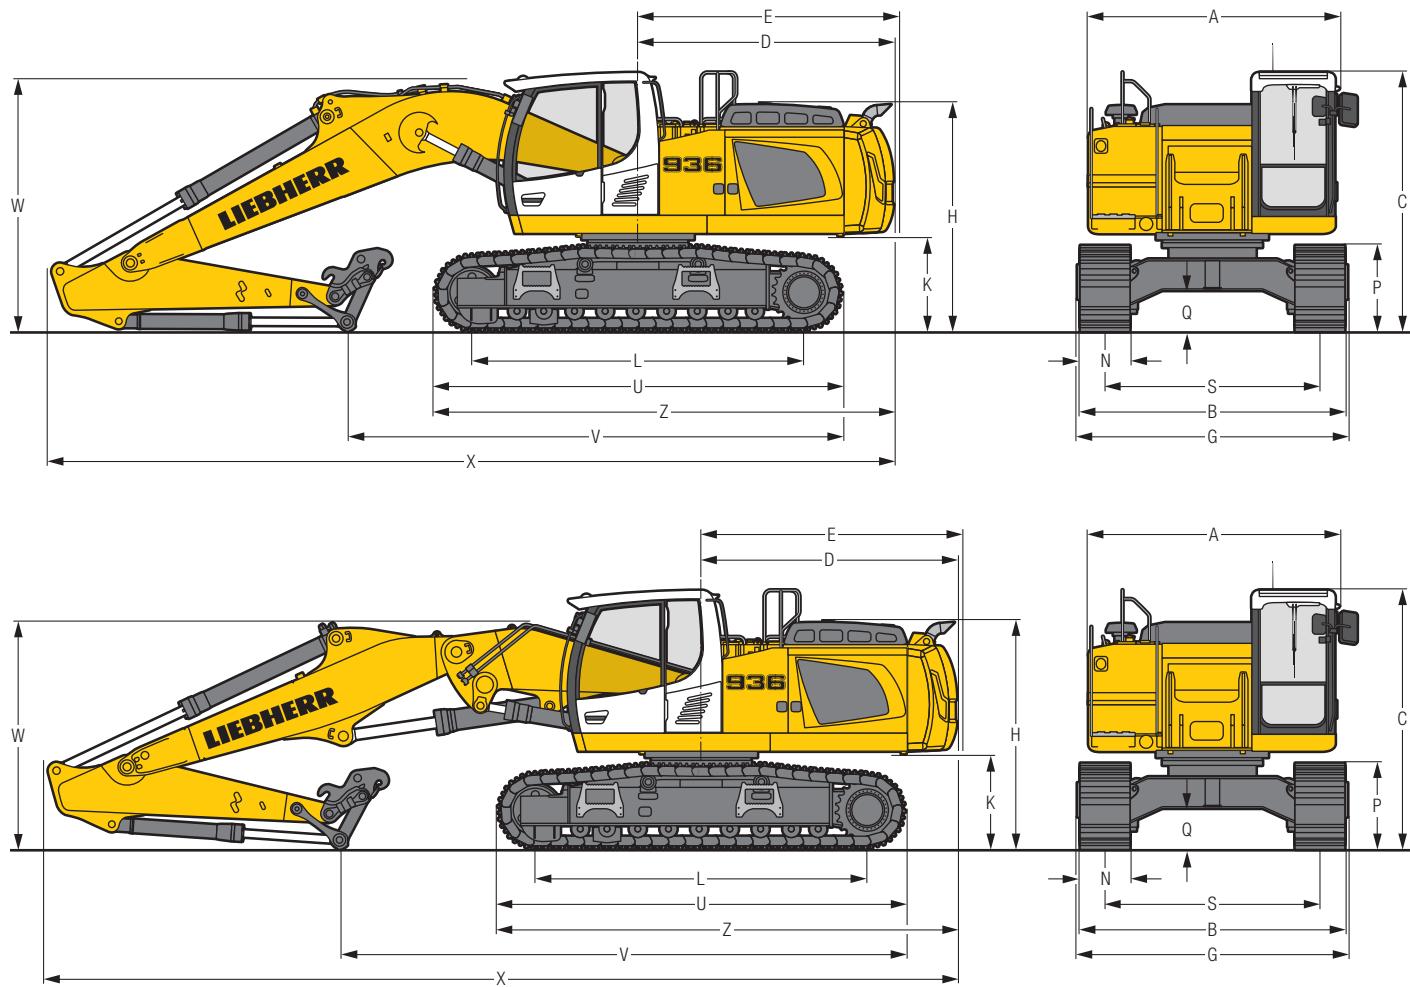

Bearings

Bearings	sealed, low maintenance
Lubrication	automatic central lubrication system (except link and tilt geometry)

Hydraulic connections

Hydraulic connections	pipes and hoses equipped with SAE splitflange connections
Bucket	standard equipped with Liebherr tooth system

Height

Can be slewed through 360°

In longitudinal position of undercarriage

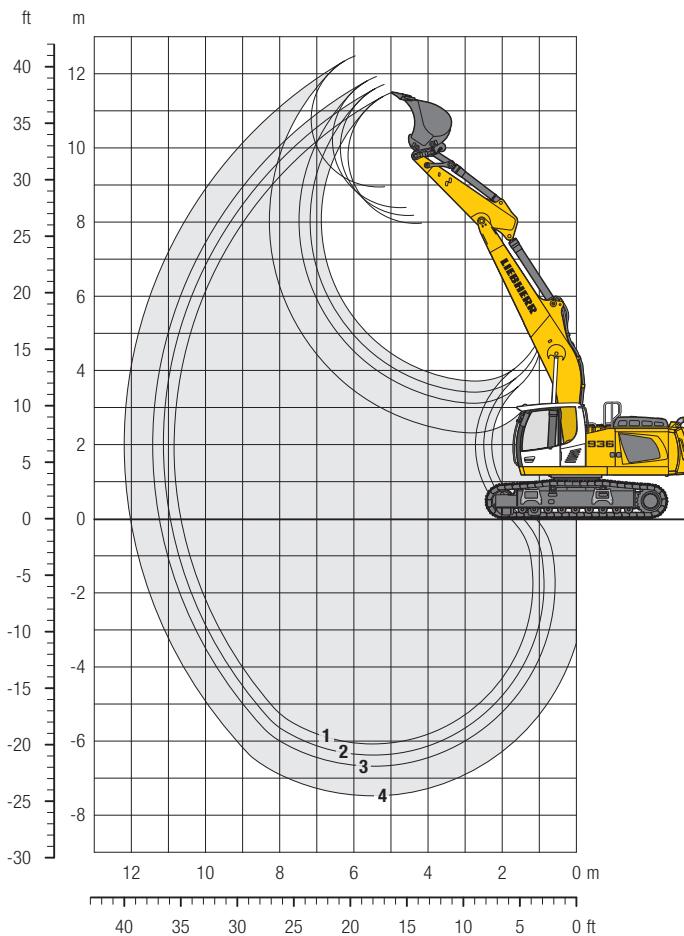

Max. reach

* Limited by hydr. capacity

The load values are quoted in lb x 1,000 at stick end (without bucket), and may be swung 360° on firm and even ground. Adjacent values are valid for the undercarriage when in the longitudinal position. Capacities are valid for 30" wide track pads. Indicated loads are based on ISO 10567 standard and do not exceed 75% of tipping or 87% of hydraulic capacity (indicated via *). Without bucket cylinder, link and lever the lift capacities will increase by 880 lb. Lifting capacity of the excavator is limited by machine stability and hydraulic capacity.

Backhoe Bucket

with Straight Mono Boom 21'4" and Counterweight 11,905 lb

Operating Weight and Ground Pressure

The operating weight includes the basic machine with counterweight 11,905 lb, straight mono boom 21'4", stick 8'2", quick coupler SW66 and bucket 1.31 yd³ (2,115 lb).

Undercarriage		NLC			LC		
Pad width	in	20"	24"	30"	20"	24"	30"
Weight	lb	68,345	69,115	71,210	68,565	69,335	71,210

Undercarriage		LC-V		
Pad width	in	20"	24"	30"
Weight	lb	76,940	77,935	79,480

Optional: heavy counterweight
(counterweight 13,890 lb increases the operating weight by 1,985 lb and ground pressure by 0.3 psi) see load tables on page 27

Buckets Machine stability per ISO 10567* (75% of tipping capacity)

Max. reach * Limited by hydr. capacity

The load values are quoted in lb x 1,000 at stick end (without bucket), and may be swung 360° on firm and even ground. Adjacent values are valid for the undercarriage when in the longitudinal position. Capacities are valid for 30" wide track pads. Indicated loads are based on ISO 10567 standard and do not exceed 75% of tipping or 87% of hydraulic capacity (indicated via *). Without bucket cylinder, link and lever the lift capacities will increase by 880 lb. Lifting capacity of the excavator is limited by machine stability and hydraulic capacity.

Height

Can be slewed through 360°

In longitudinal position of undercarriage

Max reach

* Limited by hydr. capacity

The load values are quoted in lb x 1,000 at stick end (without bucket), and may be swung 360° on firm and even ground. Adjacent values are valid for the undercarriage when in the longitudinal position. Capacities are valid for 30" wide track pads. Indicated loads are based on ISO 10567 standard and do not exceed 75% of tipping or 87% of hydraulic capacity (indicated via *). Without bucket cylinder, link and lever the lift capacities will increase by 880 lb. Lifting capacity of the excavator is limited by machine stability and hydraulic capacity.

Lift Capacities

with Straight Mono Boom 21'4" and Counterweight 13,890 lb

Height

Can be slewed through 360°

In longitudinal position of undercarriage

Max. reach

* Limited by hydr. capacity

The load values are quoted in lb x 1,000 at stick end (without bucket), and may be swung 360° on firm and even ground. Adjacent values are valid for the undercarriage when in the longitudinal position. Capacities are valid for 30" wide track pads. Indicated loads are based on ISO 10567 standard and do not exceed 75% of tipping or 87% of hydraulic capacity (indicated via *). Without bucket cylinder, link and lever the lift capacities will increase by 880 lb. Lifting capacity of the excavator is limited by machine stability and hydraulic capacity.

Available HD Buckets

Buckets Machine stability per ISO 10567* (75% of tipping capacity)

Standard Equipment

Undercarriage

- Lashing eyelets
- Sprocket with dirt ejector
- Track guide (one piece per track frame)
- Track rollers, lifetime-lubricated
- Tracks, sealed and greased

Uppercarriage

- Engine hood with gas spring opening
- Handrails
- Manual main switch
- Non slip surfaces
- Right-hand rearview mirror
- Sound insulation
- Storage box, lockable
- Swing brake lock, maintenance-free
- Swing drive oil tank
- Tool set 29 pieces

Hydraulic System

- Filter with integrated fine filter area
- Liebherr hydraulic oil
- Positive Control system
- Pressure storage for controlled lowering of equipment with engine turned off
- Pressure test ports for hydraulic
- Separate swing circuit
- Shut-off valve between hydraulic tank and pumps
- Work mode selector

Engine

- Common-Rail injection system
- Conform with stage IV/Tier 4f emission standard
- Engine idling, automatic, sensor-controlled
- Fixed geometry turbo charger
- Fuel filter and water separator
- Intcooler
- Liebherr SCR technology
- Stepless adjustable engine speed

Operator's Cab

- 7" color multifunction display with touchscreen
- Air conditioning, automatic
- Cigarette lighter and ashtray
- Coat hook
- Cup holder
- Fuel consumption indicator on touchscreen
- Headlights (two pieces, Halogen)
- Hydraulic suspension
- Interior light
- LiDAT Plus (Liebherr data transfer system)*
- Mechanical hour meters, readable from outside the cab
- Oil level monitoring on touchscreen
- Operator seat "Comfort" with horizontal and vertical damping
- Preparation for radio installation
- Rain hood over front window opening
- Rearview mirrors
- Rear view monitoring camera
- Rear window emergency exit
- Retractable seat belt 6'7"
- Roll-down sun blind
- Roof window, right window and windshield with safety glass
- ROPS safety cab structure (ISO 12117-2)
- Rubber floor mat
- Sliding windows in cab door
- Storage bin
- Storage space
- Tinted windows
- Urea tank level monitoring on touchscreen
- Windscreen, totally or partially retractable
- Wiper/washer

Attachment

- Boom oil-recirculation
- Headlight on boom (right, Halogen)
- Liebherr central lubrication system, fully-automatic (except connecting link for bucket kinematics)
- Load valve for stick cylinder (on distributor)
- Safety check valves on hoist cylinders
- Stick oil-recirculation

Non-exhaustive list, please contact us for further information.

* optionally extendable after one year

Options

Undercarriage

- Chain kit, reinforced (D7G)
- Cover and base protection plates
- Special painting
- Steps, wide version
- Storage box
- Track guides (three pieces per track frame)
- Track pads, angled or chamfered

Uppercarriage

- Additional headlights on uppercarriage (Halogen or LED) with protection
- Additional right-hand rearview mirror
- Bottom and lateral protection for uppercarriage
- Camera for side area monitoring
- Diesel refuelling pump (electric)
- Electric socket for external start-up aid (24 V)
- Electric socket for urea filling station (24 V)
- Fan drive, reversible
- Fine filter protection grid for radiator
- Fuel anti-theft device
- Fuel tank cap lockable with padlock
- Heavy counterweight
- SkyView 360° camera
- Special painting
- Storage box with extended tool set 40 pieces (incl. toolbox)
- Walkway, foldable
- Wiggins quick-coupling for fuel

Hydraulic System

- Hydraulic bypass fine filter
- Liebherr hydraulic oil, adapted for extreme climate conditions
- Liebherr hydraulic oil, biodegradable

Engine

- Air pre-filter with dust trap
- Automatic engine shut-down on idle (adjustable)
- Engine compartment lighting
- Engine shut-down self-timer
- Liebherr particle filter
- Wiggins quick coupling for engine oil

Operator's Cab

- Additional front and/or rear cab headlights (Halogen or LED)
- Adjustable intensity headlights (LED)
- Amber beacon
- Auxiliary heater (programmable)
- Electric cool box (12 V)
- Electronic immobilizer
- Emergency stop button in cab

Operator's Cab

- Falling objects protection structure (FOPS)
- Fire extinguisher
- First-aid kit
- Follow me home headlights
- Footrest
- Front guard protection structure (FGPS)
- Front headlights (two pieces, LED)
- Handrest for joysticks
- Impact-resistant front window (one piece, non removable)
- Impact-resistant roof window
- Integral protection guard
- Liebherr proportional control (mini-joysticks 2 axis)
- Lower part windshield wiper
- Operator seat "Comfort" with four-point harness
- Operator seat "Premium" with integrated ventilation
- Radio "Comfort"
- Roof window wiper
- Special painting
- Sun visor
- Sunshield on cab roof
- Switchable high-pressure control
- Travel alarm

Attachment

- Additional headlight on boom (left, Halogen or LED)
- Automatic lubrication system for connecting link
- Bottom protection for stick
- Eyelet on stick
- Filter for hydraulic hammer return flow
- Headlight on boom (right, LED)
- Headlights protection
- High pressure circuit
- Hoist cylinder stroke limitation, adjustable
- Hoist cylinders float position
- Hydraulic circuit for grapple
- Hydraulic or mechanical quick coupler
- Liebherr bucket range
- Liebherr tooth system
- LIKUFIX (quick-coupling system for hydraulic tools)
- Lubricant hoses protection on stick
- Middle pressure circuit
- Overload warning device
- Piston rod protection for adjustable cylinder
- Piston rod protection for bucket cylinder
- Piston rod protection for stick cylinder
- Preparation for automatic pedestrian detection system
- Preparation for machine guidance system
- Preparation for weighing system
- Protection for quick change-couplings, sideways on stick
- Safety check valves for stick cylinder
- Special painting
- Stick cylinder stroke limitation, adjustable
- Tool Control, 10 tool adjustments selectable via display
- Tool Management, automatic tool recognition (in combination with LIKUFIX)

Non-exhaustive list, please contact us for further information.

Options and/or special attachments, supplied by vendors other than Liebherr, are only to be installed with the knowledge and approval of Liebherr in order to retain warranty.

The Liebherr Group of Companies

Wide Product Range

The Liebherr Group is one of the largest construction equipment manufacturers in the world. Liebherr's high-value products and services enjoy a high reputation in many other fields. The wide range includes domestic appliances, aerospace and transportation systems, machine tools and maritime cranes.

Exceptional Customer Benefit

Every product line provides a complete range of models in many different versions. With both their technical excellence and acknowledged quality, Liebherr products offer a maximum of customer benefits in practical application.

State-of-the-art Technology

To provide consistent, top quality products, Liebherr attaches great importance to each product area, its components and core technologies. Important modules and components are developed and manufactured in-house, for instance the entire drive and control technology for construction equipment and mining trucks.

Worldwide and Independent

Hans Liebherr founded the Liebherr family company in 1949. Since that time, the enterprise has steadily grown to a group of more than 130 companies with over 41,000 employees located on all continents. The corporate headquarters of the Group is Liebherr-International AG in Bulle, Switzerland. The Liebherr family is the sole owner of the company.
