# DESIGNED FOR PRODUCTIVITY

## 1300 Series Horizontal Impactors— Rugged, Dependable, Productive

Terex® Minerals Processing Systems is known for quality crushing equipment and the Terex® Cedarapids 1300 Series horizontal impact crushers keep that tradition going strong.

The 1300 Series crushers with large feed openings, heavy-duty aprons and rugged rotors, are designed to handle big feed sizes and high capacity crushing. The patented wedge bar system is just one of many features we've incorporated for reliable operation and to make maintenance fast and easy. Super hard wear surfaces keep you running longer in tough conditions. These features, along with many others, add up to give you high production, easy maintenance, and long life — providing you excellent value for your investment.

### Rugged Rotor Design

(Primary configuration shown)

Massive cast manganese "monoblock" reversible primary apron for large feed and long life

Quick removal primary and secondary aprons

Replaceable AR500 frame liners

Large feed opening

Flanged for attaching feed adapters and curtains

Balanced high inertia rotor with one-piece impeller bars

Low profile design fits tight installations

Underside feed chute AR500 wear plates adjust to strip rotor air stream in secondary crushing

Taconite-type labyrinth seals

Large spherical roller bearings with hydraulic removal

High strength flared chrome-nickel-moly shaft

High chrome cast liners on secondary apron
